

GOLDEN'S CARPET CLEANING The Only True Steam

We don't use your electricity or hot water!

Golden Adds Powerful Carpet Cleaning Unit.

An all new revolutionary way to clean carpeting now is available in the Plattsburgh area through Golden's Steam Cleaning.

It is the fantastic Turbo-matic, in truck Steamway carpet cleaning unit that now permits factory trained technicians to clean any size carpet anywhere from homes and offices to large plants and commercial institutions.

It doesn't matter how large or difficult the job, Golden's have the equipment to do the work even more professionally and efficiently. With this new powerful equipment Golden's crews break up the soil and residue ground into carpeting faster than ever before and rapidly remove it with absolutely no problems. All carpeting is ready to use within a few hours and definitely by the next day's business. Specially designed during a two-year program by International Equipment Co. of Denver, Colorado and then tested another year before being turned over to the dealers and distributors

throughout the country, the unit is operated by a powerful, special engine mounted in a Golden van. Only a long hose and vacuum are brought indoors and all that is heard is a mild hissing while the carpet is being cleaned. 400 feet of special hose allows crews to clean almost anywhere since the hose can even be run from the truck to a third story window for easy application. Distance from the van has no effect on the quality of cleaning since the self-contained engine is designed to always have plenty of power to spare.

Bring In Your Dirty Scatter Rug or Runner For A Free Cleaning Demonstration At Our P-R Home Show Exhibit

We invite customers to make appointments now for day or night cleaning by calling Golden's office at 563-3491.
